Spaceflight

Volume IV

1962

Editor: KENNETH W. GATLAND, F.R.A.S., F.B.I.S.

1962 - 1967
Sci R v. 4-6

Published by the British Interplanetary Society

JAN 11 1966

Subject Index

Air-breathing Booster, The, 142.
Alone in the Universe? (J. W. Macvey), 125.
"Apogee" and "perigee," 66.
Apollo project, 141, 152.
Astronautics and Art (A. E. Speer), 196.
Astronautics in School Chemistry and Biology (D. H. Howle), 200.
Astronautics in School Mathematics and Physics (N. H. Langton), 183.
Atlas, 2, 151, 153, 154.
  -Agena B, 25, 37, 47, 105, 109, 112, 142, 143, 151, 181.
  -Centaur, 63, 139.
  -D, 40, 86, 105.
Attitude control system, 114.
Australian Contributions to a European Space Programme (H. J. Higgs), 21.

Baikonur (Kazakhstan) cosmodrome, 148.
B.I.S., 40, 62, 69, 141.
Black Knight, 11, 66, 139.
Bloodhound, 143.
Blue Streak, 11, 13, 14, 21, 23, 69, 78.
  Booster, The, 2.
  Satellite Launcher, 5.
Bristol Siddeley engines, 66, 142.
Britain and Space (S. W. Greenwood), 78.
British National Space Committee, 42.

Canada's First Satellite (H. R. Warren and J. Mar), 70.
Cape Canaveral, 35, 37, 38, 131, 181.
  launch complexes, 182.
Carpenter, Cdr. S., 105, 179.
Centaur, 81, 84, 88, 108, 109, 151.
Clock Paradox, The (A. Landau and Y. Rumer), 132, 212.
Communications satellites, 152.
  Relay, 69, 114, 158, 162, 163.
  Telstar, 69, 156.
Communication ground stations, 58, 69, 156, 160, 162.
Cosmic dust detector, 57.
Cosmic radiation, 53.
Cospar, 41, 91.
Costs of Space Exploration, The (A. M. Rothrock), 106.

Deep Space Instrumentation Facility, 58.
Delta, 108, 109, 112, 152, 157, 161.
Die Rakete, 33.
Digital solar aspect sensor, 114.

E.L.D.O., 1, 69, 169.
Electric Propulsion (E. Mitchell and R. J. Hayes), 81.
E.S.R.O., 1, 2, 14, 169.
European Space Launcher, 4, 14.
European Space Programme, 10, 21, 22, 41, 78, 168.
Extendable Antennae, 30, 72.

First Soviet "Group Flight" in Orbit, 207.
First U.S. prototype of a booster size, segmented, solid-propellent rocket engine, 46.
Floating launch platforms, 144.
French Space Committee, 42.

Gagarin, Major Y., 9, 10, 30, 115, 145, 146, 179, 206, 212.
Gamma Mk. 201 engine, 66.
  Mk. 301, 66.
Gemini project, 105.
Glenn, Lt.-Col. J., 37, 86, 115, 179, 205.

Hypersonic ramjet aircraft, 142.

I.A.F., 89.
Implications of NOT having a Space Programme, The (A. V. Cleaver), 22.
International Institute of Space Law, The (R. D. Crane), 89
  Statutes of, 95.
Introducing Eurospace, 168.
Introducing O.S.O., 59.
Irradiation and space travel, 120.
Italian Space Committee, 42.

Javelin, 30.
Jodrell Bank, 11.

Life in the Universe (A. E. Slater), 88, 176.
Little Joe booster system, 153.
Lunar capsule, rough-landing, 80.
Lunar Excursion Module, 141.
Lyman-alpha radiation detector, 56.

Manned Lunar Landing Project, 152.
Man's First 24 Hours in Space (A. Trifonov), 26.
Mars space-probe, impression of, 81.
Mendan tracking centre, 11.
Mercury Plaque, The, 38.
Mercury project, 3, 38, 105, 152, 204.
  Aurora 7, 105.
  MA-6, 37, 86; MR-3, 153; MR-4, 153.
  Sigma 7, 177.
Moon, Changes on the, 100.
Moonwatch, 64.
Mount Stromlo Observatory, 21.
My Day in Space (Major G. Titov), 146.

N.A.S.A., 9, 15, 38, 41, 47, 59, 62, 73, 78, 105, 128, 131, 141, 15
  158, 177.
  Invention Awards, More, 114.
  Launch Vehicle Development, 108, 152.
  Lunar and Planetary Programme, 107, 108.
  Scientific Satellites (list), 108.
  Sounding rocket programme, 108.
  Spacecraft Tracking and Data Aquisition System, 111.
  Spaceflight Programmes in 1960–61, Some Results of the, (M. J. Stoller), 151.
  Space Sciences Programme, 107, 154.
Nikolayev, Major A. and Popovitch, Lt.-Col. P., 177, 207.
Nikolai Kibalchich (A. Chernyak), 130.
Nova, 38, 81, 141, 151, 152.

Operation SeaBee (L. J. Halsema), 63.
Orbit Demonstration Models (J. R. Millburn), 187.
Orreries, 187.

von Pirquet, Ing. Guido, 33, 100.
Planets (minor)
  Adonis, 45.
  Amor, 45.
  Apollo, 45.
  Hermes, 45, 175.
  Icarus, 45.
Political and Economic Factors Relating to European Spac
  Co-operation (D. Price), 6.
Practical Model Making (M. F. Allward), 193.
Practical Rocketry in School (P. A. Hilton), 190.
Pravda, 33.
Prelude to Centaur, 63.
Proton Peril, The (T. F. Sandeman), 115, 212.

Quantitative Doppler Effect Experiment for the Grammar Schoo
  Sixth Form, A (G. E. Perry), 198.
Question of Orbits, A, 33.

Ranger project, 37, 44, 47, 80, 128.
  injection sequence, 54.
  I, 18, 25, 47, 55; II, 18, 25, 47, 49, 53; III, 37, 44, 80; IV, 3
  47, 80, 128; V, 37, 47, 80.
Redstone, 151, 154.
Rocket and satellite kits, 194.
Rocketdyne F-1 engine, 131, 152.
Rocket test rig, 190.
RL-10 engine, 63.
Rolls Royce engines, 2.
  RZ.2, 5.
Russian Venus Probe, 33, 100, 176.

Satellites, spacecraft and Space probes
  Alpha I, 154.
  Cosmos I, 145.

Satellites, spacecraft and space probes
Composite I, 37.
Discoverer XXXII, 199.
Discoverer XXXIII, 25.
Echo I, 43, 62, 151, 154, 155.
Eta, 154.
Explorer V, 75.
Explorer VI, 54, 75.
Explorer IX, 62, 152.
Explorer X, 19, 113, 151.
Explorer XII, 19, 108, 112, 113.
Injun I, 114.
Mariner II, 177, 181.
Mariner A, 56.
Mariner B, 168.
Midas III, 35.
Midas IV, 25.
Nimbus, 109, 152.
Phaeton, 127.
Pioneer V, 54, 55.
S-3a, 109.
S-16 OSO, 59.
S-27 top-side sounder, 32, 76.
S-51, 40.
Sputnik I, 10, 78, 93, 168.
Sputnik II, 9, 64.
Sputnik III, 146.
Surveyor, 168.
Tiros II, 40, 43, 151.
Tiros III, 151.
TRAAC, 44.
Transit IVB, 44.
Vanguard I, 9, 65, 154, 155.
Vostok I, 30.
Vostok II, 26, 27, 35, 87, 147.
Vostok III, 177, 207.
Vostok IV, 177, 207.
See also Mercury project and Ranger project.
Satellite Tracking Programme of the Smithsonian Astrophysical Observatory, The, 64.
Saturn, 34, 38, 63, 78, 81, 84, 151.
Advanced (C-5), 131, 141.
C-1 R & D, 106, 143.
Schirra, Cdr. W., 177.
Scout, 42, 108, 109, 112, 148, 151, 155.
Self-Defence in Outer Space (J. C. Cooper), 164.
Shepard, Cdr. A., 40, 153.
Skybolt, 23.
Skylark, 11.
SNAP-8 nuclear generator, 83.
SNAP-11 nuclear generator, 168.
Solar flare shields, 121.
Solar wind, 56.
Soviet News Review (F. J. French), 145.
Space Engineering and European Collaboration (F. R. Banks), 16.
Space law, 68, 89, 164, 175.
